

Class Test 3

Marks : 20

Time: 20 min

- 1 Convert the given infix expression into a postfix expression.

8

$$8/4+3^2-1*2$$

Scanned Character	Stack Condition	Postfix Expression

Final Answer:

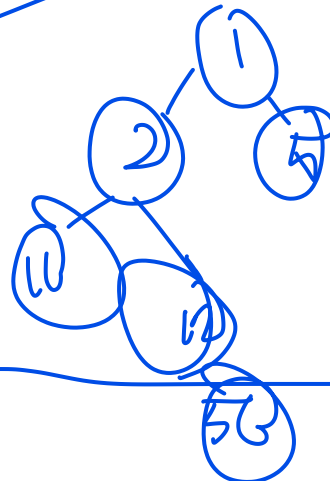

2. Draw the corresponding tree diagram for the heap array: 1, 2, 3, 10, 12, 56, 23, 12 considering the following conditions.

3+3+3

a. Heapsize = 8, Length = 8

b. Heapsize = 4, Length = 8

c. Heapsize = 5, Length = 6

3. Draw the recursive tree for the function Hanoi (3, 2, 3, 1), where the function parameters have their usual meanings. Write down the steps for disc transfer sequentially after drawing the recursive tree.

Class Test 3

Marks : 20

Time: 20 min

- 1 Convert the given infix expression into a postfix expression.

8

$$2^3 + 6 / 2 * 8 + 1$$

Scanned Character	Stack Condition	Postfix Expression

Final Answer:

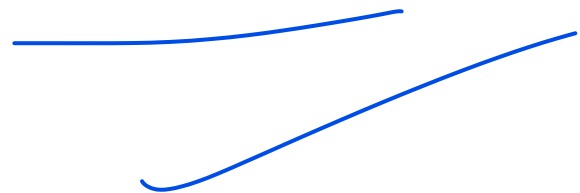

2. Draw the corresponding tree diagram for the heap array: 1,2,5,10,12,56,23,12 considering the following conditions.

3+3+3

a. Heapsize =1, Length = 8

b. Heapsize =4, Length=4

c. Heapsize =5, Length=6

3. Draw the recursive tree for the function `Hanoi (3,3,2,1)`, where the function parameters have their usual meanings. Write down the steps for disc transfer sequentially after drawing the recursive tree.
